

Anthrax Bacteria

Notice the **Tele** phone in this illustration

Attack of the killer A's

Anthrax effects on the body may not be what you think they are. Chemicals already found in the body from birth can be activated by a remote operator causing what seems to be a reaction or a positive lab result. Chemicals already present in the body are TRANSMUTABLE and can mimic the affects of any disease including Anthrax exposure lesions, infection, or rashes. The "OTHERSIDE" can kill you with or without Anthrax at a push of a button. This is an individual attack for specific reasons. Meningitis is the main problem already present in the brain.

It is highly unlikely that any pathogen enter the body and kill it that quickly without chemicals being the true cause of death or infection. Chemicals are truly to blame. Anthrax is just a cover. Anthrax spores can be sent by post (mail) or physically placed by a human on a surface of a substance. Anthrax spores can also be sent by TELEPORTATION chemicals. Anthrax spores can be combined with chemicals that have teleportive characteristics or qualities. The Anthrax spores or bacteria can even possibly be sent directly to the petri dish after a swabbing or sample being placed on it for culture. The current technology that is available to the general population including scientists is antiquated compared to the "OTHERSIDE". "THE MASTER MINDS OF SPACE AND TIME" use chemicals and technology far ahead of even our most secret and highly confidential technology. The technology and well educated staff of the "OTHERSIDE" keeps the people of our world in fear, sick, uneducated and under control. They do this for greed, population control, power, world domination, political expression, to send messages to other groups and to entertain themselves. They find willing culprits and use mind control to aid them in the crimes. ie. Hinckley, McVeigh, Sadam, Manson, Daumer, Laden, Hitler as well as all other criminals and terrorists. The "OTHERSIDE" helps them sow the seed and help's them grow it.

Transmutable: act or process of transforming, to change from one nature, species, form, or substance into another.

Teleportation: the transportation of matter through space by converting it into energy and then reconvertng it at the terminal point usually your body.

King B
